

**Mike,**

**It's great that you have made so much progress on your Bernoulli Project! Congratulations! As for the details you provided.....uuuhhhhhhhhhh? !?!**

**Mike, I've only known two geniuses personally in my lifetime of 81 years and you are one of them. Both of you share other qualities, both genuine nice (very nice) guys and always willing to help a friend and/or colleague.**

**I wish we had met and worked together much earlier in our lives when we had all the energy and mental and physical strength that comes with youth. You are obviously still going strong and you remain an inspiration. Keep at it and let me know when you publish the book....I want to be first in line to buy it (then get you to work through it with me).**

**Hope you and your loved ones are all o.k.**

**Best,**

**Your friend and former colleague,**

**Ken**
