

From a Student

I've been wanting to say this for quite some time.

If it wasn't for you, I wouldn't be where I am now. It was you who saw potential in me, and I was young. It was your puzzles, projects and the readings you provided me that truly spark my interests in mathematics and in physics.

You were a mentor, a teacher and someone I looked up to for inspiration. You provided ways for me to channel my seemingly chaotic energy into creativity.

Now that I have officially graduated from Waterloo with a mathematics degree, I look back at everything that led to where I am now, and I think of you.

Thank you, Mike,
